About CiPS[®]

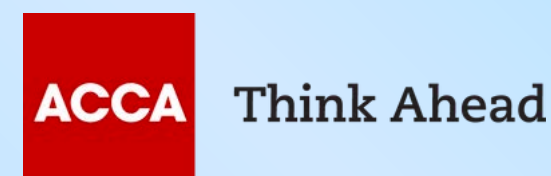

The **Certificate in Professional Sustainability (CiPS)** is a comprehensive program that integrates key components to equip professionals with the necessary skills and knowledge in sustainability, management accounting, and ethics. This globally recognised certificate is endorsed by the Association of Chartered Certified Accountants (ACCA), adding significant credibility and recognition to the qualification. The CiPS consisted of the following module:

Integration and Application

Throughout the CiPS programme, participants are encouraged to integrate knowledge from all three modules to develop a holistic understanding of sustainability in a professional context. This integration ensures that participants can apply sustainability principles effectively while maintaining high ethical standards and sound management accounting practices.

In partnership with:

CiPS[®] Components

The Trainer

Dr. Nurmazilah Dato' Mahzan

Asean CPA, CGMA, CIA, CRMA

Prior to becoming CEO of MIA, Dr. Nurmazilah held positions including Council member of MIA, Member of the Malaysian Accounting Standards Board (MASB), elected member of the Board of Governors for the Institute of Internal Auditors Malaysia (IIA Malaysia), Council member of The Malaysian Institute of Certified Public Accountants (MICPA), and Honorary Treasurer with Persatuan Ekonomi Malaysia. She also served on various committees of MIA and MICPA.

Dr. Nurmazilah's leadership as the advocate for the Environmental, Social, and Governance (ESG) program at TYMBA aims to educate our students on the importance of ESG principles. ESG serves as a screening tool at TYMBA for evaluating potential investments, ensuring they align with environmental and social considerations and safeguard the interests of all stakeholders.

TYMBA CiPS[®] Increase Efficiency and Competitiveness of Businesses

ESG Integration Knowledge:

- To equips professionals with a deep understanding of Environmental, Social, and Governance (ESG) factors. This knowledge allows microenterprises to align their operations with sustainability principles, addressing contemporary business challenges and meeting evolving consumer expectations.

Market Positioning:

- With the ESG designation, microenterprises can distinguish themselves as socially responsible and environmentally conscious businesses. This can enhance their reputation, attract socially conscious customers, and differentiate them in the market.

Risk Management:

- By incorporating ESG considerations into decision-making processes, microenterprises can better identify and manage risks related to environmental, social, and governance issues. This helps in creating a more resilient business model.

Innovation and Adaptability:

- ESG fosters a mindset of innovation and adaptability, encouraging professionals to explore sustainable business practices and consider emerging trends. Microenterprises can leverage these insights to stay ahead in a rapidly changing business landscape.

TYMBA CiPS[®] Impact

Global Recognition

Benefit from the wealth of knowledge developed by specialists from different European countries, providing microenterprise owners with a broad and diverse perspective on ESG principles

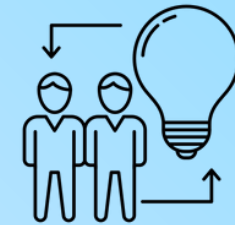

Strong Business Foundation

Access content curated by experienced practitioners and academics, offering microenterprise owners a unique blend of real-world insights and strong academic foundations tailored for practical incorporation into their businesses

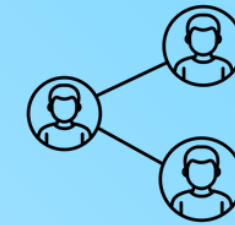

Tailor-Made for Microenterprise Context
